

**Table 6A.B.1.1:** Frequency and Survivorship of Cancers of Bones and Joints, by Group, United States 2004-2015

| Cancer Group                               | Frequency | Percent of Total | Probability of Survival at Stated Interval [1] |              |                   |              |                         |                             |
|--|-----------|------------------|--|--------------|-------------------|--------------|-------------------------|-----------------------------|
|  |           |                  | 24 Month                                       |              | 60 Month          |              | Survival Function (SDF) | SDF 95% Confidence Interval |
|  |           |                  | Survival Estimate                              | Distribution | Survival Estimate | Distribution |                         |                             |
| Cancer Group                               | Count     | Total Frequency  | 0.98   | 0.93 - 1.00  | 0.96              | 0.90 - 0.99  |                         |                             |
| Adamantinoma                               | 122       | 0.65%            | 0.98   | 0.93 - 1.00  | 0.96              | 0.90 - 0.99  |                         |                             |
| Angiosarcoma                               | 197       | 1.04%            | 0.34   | 0.28 - 0.41  | 0.24              | 0.18 - 0.31  |                         |                             |
| Chondroblastoma—malignant                  | 44        | 0.23%            | 0.95   | 0.81 - 0.99  | 0.95              | 0.81 - 0.99  |                         |                             |
| Chondrosarcoma                             | 5,983     | 31.69%           | 0.84   | 0.83 - 0.85  | 0.74              | 0.73 - 0.76  |                         |                             |
| Chordoma                                   | 1,678     | 8.89%            | 0.91   | 0.89 - 0.92  | 0.75              | 0.73 - 0.78  |                         |                             |
| Ewing sarcoma                              | 3,023     | 16.01%           | 0.78   | 0.77 - 0.80  | 0.61              | 0.59 - 0.63  |                         |                             |
| Fibrosarcoma                               | 99        | 0.52%            | 0.77   | 0.67 - 0.84  | 0.58              | 0.47 - 0.68  |                         |                             |
| Giant cell tumor of bone—malignant         | 309       | 1.64%            | 0.90   | 0.86 - 0.93  | 0.82              | 0.76 - 0.86  |                         |                             |
| Hemangioendothelioma                       | 111       | 0.59%            | 0.63   | 0.53 - 0.72  | 0.56              | 0.46 - 0.66  |                         |                             |
| Leiomyosarcoma                             | 144       | 0.76%            | 0.74   | 0.66 - 0.81  | 0.47              | 0.37 - 0.56  |                         |                             |
| Malignant fibrous histiocytoma             | 235       | 1.24%            | 0.62   | 0.55 - 0.68  | 0.46              | 0.39 - 0.53  |                         |                             |
| Neoplasm—malignant                         | 148       | 0.78%            | 0.48   | 0.39 - 0.56  | 0.35              | 0.26 - 0.44  |                         |                             |
| Osteosarcoma                               | 6,378     | 33.78%           | 0.76   | 0.75 - 0.77  | 0.60              | 0.58 - 0.61  |                         |                             |
| Primitive peripheral neuroectodermal tumor | 148       | 0.78%            | 0.68   | 0.60 - 0.75  | 0.51              | 0.42 - 0.60  |                         |                             |
| Sarcoma (NOS)                              | 262       | 1.39%            | 0.57   | 0.50 - 0.63  | 0.44              | 0.37 - 0.51  |                         |                             |
| Total All Cases                            | 18,881    | 100.00%          | 0.79   | 0.79-0.80    | 0.65              | 0.65-.066    |                         |                             |

[1] Example: The probability of survival at 24 months from diagnosis for osteosarcoma is 76% (95% confidence interval 75% to 77%) and at 60 months it is 60% (95% confidence interval 58% to 61%).
