

Table 1.7.2: Self-Reported Work Limitations for Persons Due to Select Medical Conditions, United States 2015

N (in Millions)					
	Proportion of Adults in Work Force with Work Limitation		Total Adults in Work Force with Work Limitation		
			Unable to	Limited in	
Condition	Unable to Work	Limited in Work	Work	Work	Total Persons With Any Limitation from Condition
Musculoskeletal	50.5%	28.7%	9.285	5.277	18.387
Other Conditions	63.8%	21.4%	7.932	2.660	12.432
Circulatory	60.5%	23.2%	5.227	2.004	8.639
Diabetes	61.8%	22.4%	2.479	0.899	4.012
Respiratory	64.4%	21.4%	2.188	0.727	3.398
Vision Problems	60.4%	23.4%	1.530	0.593	2.533
Birth/Mental/Developmental Defects	67.4%	19.9%	1.622	0.479	2.407
Aging	62.4%	22.4%	1.164	0.418	1.866
Cancer/Tumors	62.4%	22.4%	1.164	0.418	1.866
Hearing Problems	57.6%	22.9%	0.922	0.366	1.600
Total All Conditions	53.2%	26.7%	18.100	9.084	34.023

Prevalence of Current Work Limitations in Adults in Work Force with Select Medical Conditions per 100 Population			
Musculoskeletal	3.7	2.1	7.4
Other Conditions	3.2	1.1	5.0
Circulatory	2.1	0.8	3.5
Diabetes	1.0	0.4	1.6
Respiratory	0.9	0.3	1.4
Vision Problems	0.6	0.2	1.0
Birth/Mental/Developmental Defects	0.7	0.2	1.0
Aging	0.5	0.2	0.8
Cancer/Tumors	0.5	0.2	0.8
Hearing Problems	0.4	0.1	0.6
Total All Conditions	7.3	3.7	13.7
